

October 9, 2008

To Whom It May Concern:

Directive 2002/95/EC Restriction of Hazardous Substances (RoHS) of the European Parliament and of the Council of the European Union has required the restriction of the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE) in electrical and electronic equipment.

Spirol International Corporation recognizes our responsibility to contribute to the maintenance of a healthy environment. Our goal is to become the industry leader and a model for others in the preservation of the environment.

Spirol's standard pins, tubular and insert products manufactured from aluminum, brass, carbon steel, and stainless steel meet the requirements of Directive 2002/95/EC Restriction of Hazardous Substances (RoHS).

Spirol's manufactured products meet the exemption criteria for lead based on:

- Steel, stainless steel and steel alloy products contain less than .35 percent lead by weight.
- Aluminum products contain less than .4 percent lead by weight.
- Brass products contain less than 4 percent lead by weight.

Spirol's standard finishes: phosphate coated, trivalent zinc plated, passivated and oiled products are RoHS compliant.

For more information on ROHS requirements, contact our Quality Assurance Department or your Customer Service Representative at 860-774-8571.

Sincerely,

SPIROL INTERNATIONAL CORPORATION

Michael Woznicki
Environmental, Health, and Safety Manager
